DOWNTOWN EVENT & ENTERTAINMENT DISTRICT

Parking Comparison with SaskTel Centre

Using Site A (Midtown Shopping Centre North Parking Lot) as a comparison the Downtown area:

- has nearly 3,600 existing off-street parking stalls within the same walking distance that you would park within at SaskTel Centre
- in this same area there are an additional 900 stalls within large private lots that could potentially be converted to paid public parking outside of office hours.
- nearly 450 additional parking stalls are within a ½ block walk from the area, and there are an additional 1,860 on street parking stalls in Downtown.
- The project will also provide an additional 500 new parking stalls.

The Downtown event centre/arena site locations identified will provide distributed parking – making it easier for everyone to enter Downtown and leave with multiple ways to enter and exit in all four directions. It is anticipated that there will be ample parking for everyone.
